EDUCATION

Master of Computer Application
Auroras pg college | Hyderabad

Jun '13 - Jul '16
Percentage – 74%

Degree, B.Sc (Statistics)
Sri Vivekananda Degree College, Dharmavaram | Andhra Pradesh

June'10 - Mar '13
Percentage – 80%

KEY SKILLS

Programming Languages - Java, JavaScript,TypeScript
Frameworks - Spring Boot (JPA, MVC, REST), Vue JS
Database - Oracle, RDS
Tools - AWS (EC2,S3,Lambda,RDS)
Good knowledge on **Object Oriented Programming, OO principles**, System Design and Design Patterns.
Hands on Amazon Cloud Services (**AWS**)

PROFESSIONAL EXPERIENCE

Software Engineer   **Jul '22 - Current**
Virtusa Consultancy | Hyderabad

- I am working as a Software Engineer, where I develop and maintain testable API's and also working on AWS infra provisioning using terraform.
- Skills – **Java Spring Boot, ORM Framework, Python, AWS, Terraform,**

Software Developer   **Apr '18 - Jul '22**
Amiti Software Technologies pvt ltd | Bangalore

- Created **REST APIs** and Services and enhanced existing ones, using **Spring Boot as a Micro Service**
- Enhanced the response time and reduced the percentile latency of existing APIs by implementing **Spring Cache** and **optimizing SQL queries**.
- Strong in **Exception Handling** and followed **Object Oriented Principles**.
- Developed non-functional HTML pages from the mock ups.
- Worked in Agile framework, collaborating with business and research teams in story grooming.
- Did code reviews of other developers
- Skills - **Java Spring Boot · REST APIs · SQL ·JPA ·Vue JS, HTML, CSS, JavaScript, Typescript, Docker**

PROJECTS

CDX – JP Morgan Chase
     This project is a vendor data integration platform to aid proactive maintenance of Party Reference Data and automates KYC lifecycles.

I am working as a Software Engineer, where I develop and maintain testable API's and also working on AWS infra provisioning using terraform.

Tech stack used – **Java Spring Boot, Python, AWS, Terraform**

Message Bus Onboarding - *JP Morgan Chase*

- I worked as a Integration Services Engineer, where I help to multiple clients who wants to have onboard their application into our Message Bus Service to consume messages from publisher.
- Tech Stack Used – **Java Spring MVC, Spring REST, JSP, Javascript, SQL, IBM MQ, XML , YAML, Grafana**

OLIQ Admin Tool – *OPENLANE*

- This project provides a user-friendly interface for different websites of multiple private label. It is having the centralize codebase with complex business logic for around 60+ different private label sites. The project mainly manages the creating new private label site, adding/modifying/deleting menus and submenus, changing logo images, managing private label sites process.
- Tech Stack Used – **Java, Spring Boot, JPA, Typescript, Bootstrap, SQL, VUE JS, Docker, Splunk, App Dynamics**
